Summary

Data Analyst fresher with a B.Sc. MPCS background and hands-on experience in Python, SQL, Excel and Power BI through practical projects. Skilled in data cleaning, data transformation, exploratory data analysis (EDA), SQL querying, data visualization, DAX, Power Query, data modeling and KPI reporting. Experienced in analyzing sales, customer, product and regional data to identify trends, performance patterns and actionable business insights. Strong analytical problem-solving and data-driven decision-making skills.

Technical Skills

Programming Languages:	Python, SQL
Libraries & Frameworks:	Pandas, NumPy, Matplotlib, Seaborn
Database:	MySQL, SQL Server, SQLite
Tools & Platforms:	Power BI, Excel, Jupyter Notebook, Google Colab, Git, GitHub

Projects

Indian Retail & E-Commerce Sales Analytics *Python | Pandas | NumPy | SQL | Power BI*

- Analyzed a 100K+ row Indian retail and e-commerce dataset covering customer, product, transaction, sales and regional information.
- Cleaned raw data using Pandas by handling missing values, duplicate records, inconsistent formats and invalid data entries.
- Performed EDA using Pandas, NumPy and Matplotlib to identify sales trends, customer behavior, product performance and regional patterns.
- Used SQL to perform customer, product, sales and regional analysis using JOINs, aggregations, subqueries and analytical queries.
- Developed an interactive Power BI dashboard with KPI cards, sales trends, category analysis, product performance and geographic insights.
- Created DAX measures for Total Sales, Profit, Orders, Customers, Average Order Value and Return Rate to support business KPI reporting.

Superstore Sales & Profit Analytics Dashboard *Power BI | DAX | Excel*

- Developed an interactive Power BI dashboard to analyze sales, profit, customers, products, categories, regions and shipping performance.
- Created a Date Table and implemented DAX time-intelligence measures including Sales YTD, Sales MTD, Sales LY and Growth Percentage.
- Developed Running Total, Average Order Value, product ranking, Top 10 and Bottom 10 product measures using DAX.
- Designed KPI cards, trend charts, category analysis, regional analysis and interactive slicers for business reporting.

SQL Business Analytics Project *MySQL | SQL Server | SQLite*

- Analyzed a relational business dataset using SQL to answer customer, product, sales and performance-related business questions.
- Applied filtering, aggregation, GROUP BY, HAVING, CASE statements and aggregate functions for business analysis.
- Used INNER JOIN, LEFT JOIN, multi-table JOINs, subqueries and CTEs to combine and analyze related datasets.
- Applied RANK(), ROW_NUMBER() and window functions to identify rankings, trends and top-performing business segments.

Education

Bachelor of Science (B.Sc.) – MPCS **2023-2026**

MKR Government Degree College, Devarakonda

Mahatma Gandhi University, Nalgonda, Telangana

CGPA: 7.85/10

Intermediate – MPC **2020-2022**

Telangana State Board of Intermediate Education

Certifications

Python *OneRoadmap | Issued Jun 2026*

Deloitte Australia - Data Analytics Job Simulation *Forage | Issued Jun 2026*

Credential ID: 8BQNfet7zLGRNgRBc
